

- b) Summary of the training sessions;
- c) The names and qualifications of persons who conducted the training;
- d) The names and qualifications or persons who attended the training sessions.

Medical Records

- Medical records shall be maintained for each employee with occupational exposure in accordance with 29 CFR 1910.20.
- Human Resources shall maintain the required medical records. All employee medical records shall be kept confidential and shall not be disclosed or reported without employee's express written consent to any person within to outside the workplace except as required by the standard or as may be required by law. Employee medical records shall be maintained for at least the durations of employment plus thirty (30) years in accordance with CFR 1910.1020.
- Employee medical records shall be provided upon request of the employee or to anyone having written consent of the employee with fifteen (15) business day.

Section 10: Records.....	6
References.....	6
Respirator Fit Test Record.....	7

Section 1: Purpose

The elements described in this plan are designed to ensure the safe and effective usage of respiratory protection at Erie County Emergency Medical Services.

Section 2: Scope

This policy applies to all Erie County Emergency Medical Services certified care providers.

Section 3: Definitions

Program Administrator - Person in charge of implementing the Respiratory Protection Plan and maintaining the Respiratory Protection Plan.

N95 Respirator - An N95 Respirator is a particulate-filtering facepiece respirator that meets the U.S. National Institute for Occupational Safety and Health (NIOSH) N95 classification of air filtration, meaning that it filters at least 95% of airborne particles.

Fit Test – The use of a protocol to evaluate the fit of a respirator on an individual.

Qualitative Fit Test – A pass/fail fit test to assess the adequacy of the respirator fit that relies on the individual's response to a test agent.

Section 4: Program Administration

The Program Administrator is responsible for the overall implementation and maintenance of the Respiratory Protection Plan.

Program Administrator duties include:

- Review Sanitation / Storage procedures.
- Perform periodic audits to ensure respirators are properly stored, inspected and maintained.
- Monitor compliance for this program.
- Provide training for affected employees.
- Provide annual respirator fit testing.

The Program Administrator does not need to be physically present for all of these duties, but must ensure their completion.

Supervisors are responsible for ensuring that the respiratory protection program is implemented in their particular areas. In addition to being knowledgeable about the program requirements for their own protection, supervisors must also ensure that the program is understood and followed by the employees under their charge.

Each employee is responsible for wearing his or her respirator when required and in the manner in which they are trained.

Section 5: Equipment

N95 Respirator

- Erie County Emergency Medical Services uses the N95 Respirator for respiratory protection against airborne communicable disease. If an employee suspects that any patient presents signs and/or symptoms of an airborne communicable disease, the N95 Respirator shall be properly donned and worn during patient care and transport. The mask will not be removed until patient care has been transferred to the receiving facility and/or the employee is not in immediate contact with the patient.
- The N95 Respirator can be worn to protect against, but not limited to, the following:
 - a) Tuberculosis;
 - b) H1N1;
 - c) Bacterial Meningitis;
 - d) SARS;
 - e) Bacteria enriched atmospheres;
 - f) Coronavirus ("COVID-19").
- After each use, the contaminated N95 Respirator shall be removed in such a way that avoids contact with the outer surface. Contaminated N95 Respirators shall be disposed of in a red biohazard bag or an approved biohazardous waste receptacle.

Respirator Protection Schedule

Position	Respirator	Hazard	Respirator Location
EMT	N95 Respirator	Airborne Communicable Disease	EMS Vehicle Cabinet
Advanced EMT	N95 Respirator	Airborne Communicable Disease	EMS Vehicle Cabinet
EMT - Critical Care	N95 Respirator	Airborne Communicable Disease	EMS Vehicle Cabinet
Paramedic	N95 Respirator	Airborne Communicable Disease	EMS Vehicle Cabinet

Section 6: Medical Evaluation

Individuals assigned to tasks that require the use of respiratory protection will have a medical evaluation to determine if they are able to perform the work while wearing a respirator.

The medical evaluations will be reviewed by a Physician or other licensed health care professional ("PLHCP"). PLHCP will evaluate the employee using a Respirator Medical Evaluation Questionnaire form.

The evaluation will be given prior to an employee being allowed to wear respirator.

****See attached *Respirator Medical Evaluation Questionnaire* form****

A follow-up medical evaluation is required for the following:

- An employee reports medical symptoms that are related to the ability to use a respirator.
- A PLHCP, supervisor or Program Administrator reports that the employee needs reevaluation
- Information from the Respiratory Protection Plan, including observations made during fit-testing and program evaluation, indicates a need for reevaluation.
- There is an increase in the physiological burden placed on the employee from temperature changes, changes in PPE, etc.

Section 7: Training

N95 Respirator training shall be conducted by qualified instructors.

Training shall be required annually for all employees that come into contact with patients. Training shall include the following:

- Why the respirator is necessary;
- How improper fit, usage, and maintenance can be detrimental to the employee;
- When to use the respirator;
- How to maintain and store the respirator;
- How to use the respirator in emergency situations (i.e.- respirator malfunction);
- Limitations and capabilities of the respirator;
- How to inspect, don, and remove the respirator;
- How to recognize medical signs and symptoms that may limit or prevent the effective use of the respirator;
- The general requirements of this program.

Section 8: Fit Testing

Fit-testing shall be conducted by a trained individual.

Fit-testing is required annually for all Erie County Emergency Medical Services employees. The employee wearing the N95 Respirator will undergo a qualitative fit-test using Bitrex.

Employees will be fit tested with the make, model, and size of the N95 Respirator that they will actually wear. Employees will be provided with several models and sizes of the N95 Respirator so that they may find an optimal fit.

Section 9: Program Evaluation

The program administrator will evaluate this program annually or more often if necessary to ensure it remains effective. The administrator will consult employees about proper respirator fit, selection, use and maintenance and make periodic workplace observations to confirm that respirators are being used and maintained properly.

Section 10: Records

Erie County Emergency Medical Services shall keep written records regarding all training, fit testing, medical evaluations, and exposures.

Erie County Emergency Medical Services

Policy & Procedure

Policy: Cleaning & Disinfection

Policy Number: 23-22

Effective Date: 08/18/2023

Approved By: Karyn Krytus, Director of Ambulance Services; Gregory Gill, Deputy Commissioner of Health and Emergency Medical Services

Section 1: Purpose

To ensure that Erie County Emergency Medical Services vehicles and equipment are properly cleaned and disinfected following each patient encounter.

To provide a safe and sterile environment for Erie County Emergency Medical Services personnel and patients.

New York State Department of Health 10 NYCRR of Part 800 – Emergency Medical Services, requires that every New York State ambulance or Advanced Life Support First Response service have and enforce a written policy concerning cleaning and decontamination.

Section 2: Scope

This policy applies to all Erie County Emergency Medical Services employees.

Section 3: Definitions

Cleaning is defined as the physical removal of foreign and organic materials such as blood, body fluids, and disease causing microorganisms or germs from a surface or object. Cleaning physically removes, but does not kill, germs. Cleaning is accomplished by using water, detergents, and a scrubbing action. The key to cleaning is the use of friction to remove debris and reduce presence of germs.

Disinfection is the process used to kill and prevent the growth of germs on objects and surfaces. Disinfection is accomplished through the use of chemical products regulated by the U.S. Environmental Protection Agency ("EPA"). Disinfectants should only be used after items have been thoroughly cleaned.

Section 4: Cleaning & Disinfection

Cleaning and disinfection should be done as soon as possible after each patient encounter. Disinfectants should be used according to the manufacturer's instructions. Adhere to any safety precautions or other recommendations as directed by the manufacturer.

The following cleaning and disinfection procedures shall be performed following each patient encounter:

Vehicle & Equipment Cleaning

- Wear gloves anytime there may be hand contact with blood and/or other potential infectious material ("OPIM") and when handling or touching contaminated items or surfaces;
- Check the vehicle for sharps that may have been left, and carefully dispose of them in a sharps container. Contaminated sharps shall be placed in sharps containers that are closable, puncture-resistant, leak proof on the sides and bottom and appropriately labeled or color-coded;
- Remove used or soiled laundry. Place the contaminated laundry in a leak-proof, labeled or color-coded bag or an approved soiled laundry receptacle;
- Discard any disposable equipment, soiled dressings, bloody material, and other contaminated non-sharps waste in a red biohazard bag or an approved biohazard receptacle;
- Contaminated reusable patient care devices and equipment should be placed in clearly marked biohazard bags for appropriate cleaning and disinfection;
- Discard any trash in an approved receptacle.

Vehicle & Equipment Disinfection

- Personal Protective Equipment ("PPE") shall be worn while using disinfectants;
- Disinfect surfaces and reusable equipment that have been in direct contact with patients;
- Disinfectants need to remain wet for at least one (1) minute or as recommended by the manufacturer;
- Allow the surface to air dry, wiping the surface with a towel or dry cloth may recontaminate the surface.

- High-risk surfaces shall require disinfection after each patient encounter:
 - a) Stretchers/Railings;
 - b) Door handles;
 - c) Steering wheel;
 - d) Stethoscopes;
 - e) Monitoring equipment;
 - f) Work surfaces;
 - g) Computer keyboards;
 - h) Radios.
- Low-risk surfaces shall require disinfection on a regular basis or when contamination occurs:
 - a) Floors;
 - b) Walls;
 - c) Ceilings;
 - d) Windows;
 - e) Cabinets.

Attachment: Ebola Virus Disease Screening for EMS.....	12

Section 1: Purpose

To provide information and guidance to Erie County Emergency Medical Services providers in the preparation of plans specific to an Ebola Virus Disease ("EVD") response.

Section 2: Scope

This policy applies to all authorized Erie County Medical Services care providers.

Section 3: Background

The likelihood of contracting Ebola is extremely low unless a person has direct unprotected contact with body fluids (like urine, saliva, feces, vomit, sweat, and semen) of a person who is sick with Ebola. Ebola is not spread through the air or by water, or in general, by food. Initial signs and symptoms of Ebola include sudden fever and muscle aches, diarrhea, nausea, vomiting, and abdominal pain occurring about 1 week after exposure. The incubation period for Ebola, from exposure to when signs or symptoms appear, ranges from 2 to 21 days (most commonly 8-10 days). Any Ebola patient with signs or symptoms should be considered infectious.

**Ebola patients without signs or symptoms are not contagious.

Section 4: Points of Contact

As directed by the New York State Department of Health, a Primary and Secondary Point of Contact must be identified and available for updates and notifications regarding EVD:

- Primary: Karyn Krytus, Director of Ambulance Services; Cell: (716) 393-7646
- Secondary: Christopher Ford Jr, Supervising Paramedic; Cell: (716) 381-2335

Section 5: Personal Protection

Various means of protection employed by the Emergency Medical Services ("EMS") provider will provide protection from all routes of entry through the proper donning and doffing of personal protective equipment ("PPE"), placing barriers in the patient compartment of the ambulance, completing proper decontamination of the ambulance/equipment and proper disposal of the waste generated. The following guidelines should be observed during these processes:

- Isolation of the ambulance surfaces in the patient compartment while making available necessary patient care equipment, taking care to limit invasive procedures;

- Proper wearing of appropriate PPE: Providers should wear: Tyvek suits (impermeable gown if Tyvek suit is not immediately available), eye protection (goggles which seal the orbital area with face shield), double glove, and disposable shoe covers/boots and employ the “buddy” system when donning and doffing of the PPE;
- N95 masks shall be worn from initial patient contact through completion of decontamination;
- Prudent hand washing;
- Avoid aerosol-generating procedures, such as airway placement, administration of nebulized medications, tracheal suction, continuous positive airway pressure (“CPAP”), etc. If it is necessary to perform these procedures, do so after the unit pulls to a safe location and stops and after donning the above PPE including an N95 mask;
- If possible avoid starting IV access during transport. If necessary, venous access should be obtained after the unit pulls to a safe location and stops. Careful attention should be taken with the disposal of all sharps in the sharps container.

Section 6: Screening Procedures

1. Address Scene Safety
 - If dispatch advises that the patient is suspected of having Ebola, EMS providers should put on the PPE appropriate for suspected cases of Ebola before entering the scene.
 - Keep the patient separated from other persons as much as possible.
 - Use caution when approaching a patient with Ebola. Illness can cause delirium, with erratic behavior that can place providers at risk of infection, e.g., flailing or staggering.
2. During patient assessment and management, EMS providers should consider the symptoms and risk factors of Ebola:
 - A relevant exposure history should be taken:
 - a) Residence in or travel to a country where an Ebola outbreak is occurring (a list of countries can be accessed at the CDC website, or
 - b) Contact with blood or body fluids of a patient known to have or suspected to have Ebola within the previous 21 days.

- c) Because the signs and symptoms of Ebola may be nonspecific and are present in other infectious and noninfectious conditions which are more frequently encountered in the United States, relevant exposure history should be first elicited to determine whether Ebola should be considered further.
- Patients who meet this criteria should be further questioned regarding the presence of signs or symptoms of EVD, including:
 - a) Fever (subjective or $\geq 100.4^{\circ}\text{F}$ or 38.0°C), and
 - b) Headache, weakness, muscle pain, vomiting and diarrhea, abdominal pain, or bleeding.
- Based on the presence of risk factors and symptoms, put on or continue to wear appropriate PPE and follow the scene safety guidelines for suspected case of Ebola.
- If during initial patient contact and assessment and before a provider has donned the appropriate PPE, it becomes apparent that the patient is a suspected case of Ebola, the EMS provider must immediately remove themselves from the area and assess whether an exposure occurred. The EMS provider should implement their Agency's exposure plan, if indicated by assessment.
 - a) To minimize potential exposure, it may be prudent to perform the initial screening from at least 3 feet away from the patient.
 - b) In addition, EMS providers may – keeping scene safety in mind – consider separating so that all crew members do not immediately enter the patient area.
- If there are no risk factors, proceed with normal EMS care.
- If the patient meets all criteria and is deemed to be a potential or confirmed Ebola case, preparations should be made to adequately transport them to the appropriate healthcare facility Erie County Medical Center ("ECMC") or Oishei Childrens Hospital ("OCH").

Section 7: Ambulance Preparation

Ambulance preparation will be done with the purpose of segregating the cab from the patient compartment and covering the cabinetry/shelving, ceiling, seating and floor with an impermeable barrier.

Supplies:

- 6 mil clear plastic sheeting;
- Duct Tape;
- Scissors.

Procedures:

All plastic sheeting should overlap prior sheets of plastic by a minimum of 1 inch. All seams should be sealed completely by duct tape.

- Cover the ceiling of the patient compartment with plastic sheeting and affix with duct tape.
- Place sheeting on the floor of the rig and affix to bench seat, jump seat and walls to create a bowl effect in an effort to channel any body fluids towards the center of the floor which will cause fluids to collect in one area;
- Place plastic sheeting over the walls (sides and bulkhead) by affixing it to the edges of the sheeting for the ceiling and floor with duct tape to enable any flow of fluid to be captured on the sheet on the floor;
- Wall sheeting should overlap with the upper portion over the lower portion to prevent any body fluid from leaking between sheets by gravity;
- The gurney antlers and clamp will need to be accessible through the plastic sheeting for safe transport of the gurney and patient. Seal these openings generously with duct tape so that all fluids flow to the sheeting on the floor;
- Leave openings around ventilation ports to allow proper air flow and exchange;
- Continue to overlap sheeting down and over seating to the floor. Cover rear doors with plastic sheeting and duct tape.

Section 8: Gurney/Cot Preparation

Supplies:

- Impermeable mattress cover and Duct Tape

Cover mattress pad with fitted impermeable mattress cover. If no impermeable mattress cover is available then use plastic sheeting and seal with duct tape.

Section 9: Crew Preparation

Ebola patient transports will be done by a maximum three person crews. The third crew member “Driver” will assume no patient contact nor enter the patient compartment, so as to remain decontaminated during the transport and to avoid contamination of the cab area. Driver will don PPE prior to patient being brought to or put in the ambulance. Prior to patient contact, each patient caregiver will don the PPE while the third crew member assists by both checking for integrity issues or exposed body parts.

Supplies:

- Tyvek Suit (impermeable);
- Goggles or full face respirator with appropriate filtered cartridge;
- N95 or P100 Respirator;
- Face shield;
- Gloves X2 (Double Glove);
- Additional Shoe Covers.

Section 10: Healthcare Facility Transfer or Care

In the Western New York area, ECMC and OCH have been identified as the Ebola Healthcare facilities.

EMS providers should notify the receiving healthcare facility when transporting a suspected Ebola patient, so that appropriate infection control precautions may be prepared prior to patient arrival.

Section 11: Facility Arrival

The driver will notify the receiving facility of arrival.

The patient care crew will take steps to prevent secondary contamination of any surfaces, such as avoiding the touching door handles with contaminated gloves.

Coordinate with hospital staff for the transfer of the patient from the ambulance into the facility.

The following items may be considered with regard to the movement of the patient from the ambulance into the facility:

- The driver should take all precautions to remain a safe distance from the patient to avoid contamination. The driver may assist by opening doors and clearing the path for patient movement.
- The driver will take decontamination and disposal sheet placing it on the ground at rear of unit with a change of shoe coverings and gloves available for the patient crew.
- Body fluid contamination on gurney wheels will be decontaminated with a disinfectant that is proven to kill non-enveloped viruses.
- Solutions proven to kill non-enveloped viruses include a 1:10 bleach-to-water solution allowed to dry for 10 minutes or an Environmental Protection Agency eEPA approved disinfectant that kills non-enveloped viruses.
- Patient crew will unload the patient and then remove current shoe covering and outer gloves and put on clean ones so as not to track potential contamination into the receiving facility. Dispose of used PPE in a Red Biohazard Bag.
- Patient will be transferred into the hospital by the patient crew at the direction of hospital staff.
- Patient crew will remove and dispose of PPE in the hospital isolation area at their direction following infection control procedures or as per the departmental policy.
- The gurney and all equipment will be considered infectious and handled with the appropriate PPE until properly decontaminated.

Section 12: Medical Waste

The decontamination sheet, PPE, materials, and other equipment will be collected and double bagged with Red Biohazard Bags at the ambulance and then placed in the rear of the ambulance for proper decontamination and disposal later if there is not a designated location to take contaminated waste. Plan to dispose of the contaminated waste at the hospital.

Section 13: Ambulance Decontamination

If the facility requests, decontaminate the ambulance onsite at their direction. Otherwise, the ambulance will be driven to a designated location for decontamination, taking into consideration segregating it from nonessential personnel. Also, consider an indoor facility to prevent contaminated materials from incidentally getting blown away and to protect it from the weather.

Personnel performing cleaning and disinfection should wear recommended PPE (described above) and consider use of additional barriers (e.g., rubber boots or shoe and leg coverings) as needed. Face protection (facemask with goggles or face shield) should be worn since tasks such as liquid waste disposal can generate splashes.

Supplies:

- Impermeable Decontamination Sheet;
- Solutions proven to kill non-enveloped viruses include a 1:10 bleach-to-water solution allowed to dry for 10 minutes or an EPA approved disinfectant that kills non-enveloped viruses. An EPA-registered hospital disinfectant with label claims for viruses that share some technical similarities to Ebola (such as, norovirus, rotavirus, adenovirus, poliovirus) and instructions for cleaning and decontaminating surfaces or objects soiled with blood or body fluids should be used according to those instructions;
- Disposable rags;
- Red Biohazard Bags;
- EVD Containers or Red Biohazard Containers labelled "Class A Infectious Waste";
- PPE supplies for use during decontamination if extra is needed.

Decontamination Procedures:

- 1) Don necessary EVD PPE;
- 2) Lay impermeable decontamination sheet on the ground at the back of the ambulance and side doors and have EVD containers available if available;
- 3) Clean up any body fluids and double bag (Red Biohazard Bags) cleaning materials placing those materials in EVD containers if available;
- 4) EVD containers should be red-biohazard containers labelled "Class A Infectious Waste" and maintained separate from all other red bag waste;
- 5) Double bag (Red Biohazard Bags) all disposable materials/equipment and place into EVD containers;
- 6) Place equipment including gurney antlers on decontamination sheet for proper disinfecting;

- 7) Remove any contaminated materials from equipment and disinfect equipment using recommended disinfectant and place on clean sheet for drying. When removing plastic sheeting wipe and large quantities of fluid, blood or body fluids prior to removing the plastic from within the ambulance;
- 8) Double bag (Red Biohazard Bags) all contaminated rags/wipes into properly labeled Red Biohazard Bags;
- 9) Remove impermeable barriers from unit and double bag (Red Biohazard Bags) placing those properly labeled EVD containers;
- 10) Fold decontamination sheets and double bag (Red Biohazard Bags) placing those in proper EVD containers;
- 11) Place new contamination sheets out;
- 12) Wipe down all surfaces inside ambulance and outside door handles with recommended disinfectant and double bag (Red Biohazard Bags) materials placing them in properly labeled EVD containers;
- 13) Remove PPE and place PPE in double bag (Red Biohazard Bags) and place in EVD containers;
- 14) Using gloves fold decontamination sheets and place in double bag (Red Biohazard Bags) with PPE and put into EVD containers;
- 15) Wash outside of ambulance in normal fashion and location using PPE.

Section 14: Follow-up/Reporting Measures

EMS providers with exposure to blood, bodily fluids, secretions, or excretions from a patient with suspected or confirmed Ebola should immediately:

- Stop working and wash the affected skin surfaces with soap and water. Mucous membranes (e.g., conjunctiva) should be irrigated with a large amount of water or eyewash solution;
- Contact the primary or secondary Ebola POC for assessment and access to post-exposure management services; and

- Receive medical evaluation and follow-up care, including fever monitoring twice daily for 21 days, after the last known exposure. They may continue to work while receiving twice daily fever checks, based upon recommendations from licensed healthcare provider and discussion with local, state, and federal public health authorities.

EMS providers who develop sudden onset of elevated body temperature or subjective fever, intense weakness or muscle pains, vomiting, diarrhea, or any signs of hemorrhage after an unprotected exposure (i.e., not wearing recommended PPE at the time of patient contact or through direct contact to blood or body fluids) to a patient with suspected or confirmed Ebola **should**:

- Not report to work or immediately stop working and isolate themselves;
- Notify their Ebola POC for assessment and access to post-exposure management services and should notify local and state health departments;
- Notify their work supervisor of situation;
- Notify the Supervisor-on-Duty for proper documentation and filing of Worker's Compensation paperwork;
- Comply with any work exclusions until they are deemed no longer infectious to others.

New York State Department of Health Bureau of Emergency Medical Services Policy Statement
21-02 Prevention and control of Ebola Virus Disease

Centers for Disease Control and Prevention Ebola Disease

Ebola Virus Disease (EVD) Screening for EMS

EMS patient assessment criteria for isolation/hospital notification are likely to be:

- 1.** Fever, headache, joint and muscle aches, weakness, fatigue, diarrhea, vomiting, stomach pain and lack of appetite, and in some cases bleeding.

AND

- 2.** Travel to West Africa (Guinea, Liberia, Nigeria, Senegal, Sierra Leone or other countries where EVD transmission has been reported by WHO) within 21 days (3 weeks) of symptom onset.

If both criteria are met:

- A. The patient should be isolated and STANDARD, CONTACT, and DROPLET precautions followed during further assessment, treatment, and transport.
- B. IMMEDIATELY report suspected Ebola cases to receiving facility.

If patient is not transported (refusal, pronouncement, etc.):

- a. Inform Local and State Public Health Authorities:
- b. Inform the U.S. Centers for Disease Control and Prevention (CDC), available 24/7 at 770-488-7100, or via the CDC Emergency Operations Center (EOC) or via email at eocreport@cdc.gov.

Erie County Emergency Medical Services

Policy & Procedure

Policy: ePCR

Policy Number: 23-24

Effective Date: 08/18/2023

Approved By: Karyn Krytus, Director of Ambulance Services; Gregory Gill, Deputy Commissioner of Health and Emergency Medical Services

Section 1: Purpose

To establish procedures for the completion and synchronization of electronic patient care reports ("ePCR").

Section 2: Scope

This policy applies to all authorized Erie County Emergency Medical Services ("ECEMS") certified care providers.

Section 3: Definitions

Patient Care Report means a document used to summarize the facts and events of an Emergency Medical Services incident and includes, type of emergency, response information, patient demographics, patient history and treatments provided.

ePCR means an electronic patient care report.

Patient means a person who requires medical care or requests assistance.

HIPAA means Health Insurance Portability and Accountability Act, a 1996 Federal Law that restricts access to individuals' private medical information.

Synchronize/Synchronization means the process by which ePCR data is transferred to the Agency's HIPAA compliant database and the facility to which the patient was transported.

PCR Worksheet means a worksheet on which data may be recorded solely to aid ECEMS providers in the completion of an ePCR. The worksheet is not a legal document, medical record, or substitute for an ePCR.

Section 4: ePCR

ECEMS shall utilize a New York State Department of Health, Bureau of Emergency Medical Services & Trauma Systems approved ePCR vendor.

A Patient Care Report/ePCR shall be completed, in its entirety, each time ECEMS is dispatched for any type of response. This includes, but not limited to:

- Patients transported to any location by ECEMS;
- Patients who refuse medical attention;
- Patients who request a lift assist;
- Patients treated by one agency and transported by another;
- Calls where no patient contact is made:
 - a) Cancelled before reaching the scene;
 - b) No patient is located;
 - c) Standbys and events.

Section 5: Submission

Patient Care Reports/ePCRs shall, upon completion, be synchronized within 4 hours of the completion of the call or by the end of shift. If a ECEMS provider is unable to complete a Patient Care Report/ePCR by the end of shift, the provider shall notify the Supervisor-on-Duty.

Section 6: PCR Worksheet

If the ePCR program is for any reason off-line or unavailable, ECEMS providers shall utilize a PCR Worksheet. As soon as the ePCR program becomes available, providers shall transfer the data from the PCR Worksheet to an ePCR and complete in full an ePCR. The PCR Worksheet is not a legal document, medical record, or substitute for ePCR.

Upon the transfer of all data from the PCR Worksheet and completion of the ePCR, ECEMS providers shall place the PCR Worksheet in an Agency station HIPAA box. Supervisors shall regularly empty HIPAA boxes and the PCR Worksheet shall be destroyed as a matter of routine.

Section 7: Privacy Practices

ECEMS providers shall maintain, at all times, the confidentiality of information about the names, treatment, and conditions of the patients treated.

ECEMS providers shall comply with all Federal, State, and local privacy laws, including, but not limited to HIPAA.

ECEMS providers shall not use personally owned computers or other personally owned electronic devices to complete or access patient care reports/ePCRs.

Section 8: Records

The Patient Care Report/ePCR is part of the patient's permanent medical record and is used for, but not limited to, the following purposes:

- a) Transfer of information to authorized healthcare providers;
- b) Medical legal documentation;
- c) Billing for services;
- d) Development of data reports for Continuous Quality Improvement ("CQI").

ECEMS shall store ePCRs in a HIPAA compliant database.

HIPAA requires that medical records be retained for six (6) years. If the call involves the treatment of persons under age 18, the ePCR must be retained for three (3) years after the child reaches age 18.

Patient Care Reports/ePCRs shall be made available for review by the New York State Department of Health upon request as required by regulation.

Policy & Procedure

Policy: Appearance & Uniforms

Policy Number: 23-26

Effective Date: 08/18/2023

Approved By: Karyn Krytus, Director of Ambulance Services; Gregory Gill, Deputy Commissioner of Health and Emergency Medical Services

Section 1: Purpose

To establish appearance and uniforms standards.

Emergency Medical Services professionals are regularly visible to the public eye, it is critical that our Emergency Medical Services professionals consistently maintain a clean and professional appearance.

Section 2: Scope

This policy applies to all on duty Erie County Emergency Medical Services certified care providers.

Section 3: Definitions

On-Duty means a certified care provider that is on the clock, assigned to an Emergency Medical Services response vehicle and in service with dispatch.

EMS – Emergency Medical Services

N95 Respirator - An N95 Respirator is a **particulate-filtering facepiece respirator** that meets the U.S. National Institute for Occupational Safety and Health (NIOSH) N95 classification of air filtration, meaning that it filters at least 95% of airborne particles.

Fit Test – The use of a protocol to evaluate the fit of a respirator on an individual.

Section 4: Policy

The uniform policy shall consist of the following:

- A blue, polo-style long sleeve or short sleeve uniform shirt, supplied by a manufacturer and vendor designated by Erie County Emergency Medical Services; or
- A blue, button-down long sleeve or short sleeve uniform shirt, supplied by a manufacturer and vendor designated by Erie County Emergency Medical Services; or
- A blue, Fire/EMS-style pullover, supplied by manufactures and vendors designated by Erie County Emergency Medical Services, worn over a plain, white or navy blue crew neck t-shirt, and/or a blue, polo-style long sleeve or short sleeve uniform shirt; or a blue, button-down long sleeve or short sleeve uniform shirt or blue turtleneck;
- Six-pocket navy blue EMS pants or navy blue four-pocket pants supplied by manufacturers and vendors designated by Erie County Emergency Medical Services; and
- A black belt; and
- Black lace-up boots made of leather or nylon/leather combination. Lace-in zippers are acceptable. Boots must fully lace and and/or zipped while on duty.
- A uniform jacket supplied by a manufacturer and vendor designated by Erie County Emergency Medical Services may be worn at the employee's option.
- Employees shall be permitted to wear a plain, navy blue or black baseball-style hat or plain, navy blue or black low-profile winter hat. Both hats must be free of logos, designs, or text, except that a baseball-style hat or winter hat, supplied by Erie County Emergency Medical Services. Hats must be worn in the forward-facing direction.
- All accessories must be black. Accessories include winter gloves, belts, and instrument, glove or scissor pouches.
- Agency issued identification tags and credentials shall be worn at all times and shall not be altered, modified, or defaced in any way.
- Hair must be neat, clean, and professional looking at all times.

- Employees are permitted to have neatly trimmed mustaches, goatees or beards.
 - a) Employees must be able to pass a respirator protection fit test;
 - b) Employees shall trim or shave mustaches, goatees or beards that affect the fit of a respirator.
- For safety reasons, Erie County Emergency Medical Services recommends that employees not wear jewelry while on duty. If an employee opts to wear jewelry while on duty, the following guidelines shall apply:
 - a) Visible piercings shall be limited to the ears. Only post or stud-style earrings are permitted. Hoops-style earrings are not permitted.
 - b) Rings that tear protective gloves shall not be worn.
 - c) Erie County is not responsible for lost, stolen or damaged jewelry.
- Employees shall remain in uniform at all times while on duty. Employees, while on duty, shall maintain a neat, clean and professional appearance. Uniforms shall be clean, pressed and in good condition. Footwear shall be clean and in good condition. Employees who fail to adhere to acceptable hygiene standards and/or fail to wear the appropriate uniform, as directed in this policy, may be subject to discipline.

Section 5: Damaged Uniforms

Any uniform item supplied by Erie County Emergency Medical Services which is worn and/or damaged beyond repair may be replaced at no charge to the employee, provided the employee returned the damaged or worn item to the Agency.

Any uniform item that is soiled with biohazardous materials shall be red bagged, labeled with the employee's name, and given to a Supervisor for proper cleaning, decontamination, or replacement at no cost to the employee.

Section 6: Separation from Employment

Upon separation of employment, all uniforms supplied by Erie County Emergency Medical Services shall be returned to the Agency in reasonably good condition.

COUNTY OF ERIE

MARK C. POLONCARZ

COUNTY EXECUTIVE

May 2, 2025

Theresa Allen, Secretary
New York State EMS Council
c/o Bureau of EMS – Operations Unit
New York State Dept. of Health
875 Central Avenue
Albany, New York 12206-1388

Re: Application for ALS Ambulance Service in Erie County

Dear Secretary Allen,

As the Erie County Executive, please accept this letter and enclosed application packet requesting full Operation Authority for Erie County as a certified Advanced Life Support (ALS) Ambulance Service as a matter Public Health Law Article 30, section 3008(7) as defined in Article 1 of the General Municipal Law. The enclosed packet includes statement of need, copy of the certified resolution passed by the Erie County Legislature authorizing application submission, and description of the area to be serviced.

Since September of 2023, Erie County has provided "safety net" coverage to a dozen of its rural towns where commercial services are not available or volunteer services lack the capacity and ability to transport. Erie County is in a strong financial position and is committed to continue this service which has reduced wait times and changed health outcomes for our residents. We would appreciate your full approval to continue this life saving work.

If you have any questions, please do not hesitate to contact Deputy Commissioner of Emergency Medical Services Gregory Gill at 716-858-2575 or at Gregory.Gill@erie.gov.

Sincerely yours,

A handwritten signature in black ink, reading "Mark C. Poloncarz", with a long horizontal flourish extending to the right.

Mark C. Poloncarz, Esq.
Erie County Executive

Erie County EMS

Advanced Life Support/ Basic Life Support EMS System Response Plan

Effective: 08/25/2023

Revised: 12/5/2023

Approved By: Karyn Krytus, Director of Ambulance Services; Gregory Gill, Deputy
Commissioner of Health and Emergency Medical Services

Objective

Erie County, New York (NY) has enacted an EMS Response Plan which covers all Advanced Life Support (ALS) and Basic Life Support (BLS) units who participate under the auspices of Erie County EMS (ECEMS). All EMS agencies within Erie County are expected to be available for response to all 9-1-1 initiated calls 24 hours a day, 7 days a week, and 365 days a year. When an agency is not available, this response plan will be utilized to identify and execute an expedited response by all assets available to ECEMS and response for emergency pre-hospital care services within Erie County, NY.

Ideals and Vision

When MERS receives a request for a response requiring ALS and/or BLS, the local public-safety answering point (PSAP) will send the appropriate units designated by the municipality as their primary responders. Municipalities are responsible for the health, safety and welfare of their residents. All EMS agencies that participate with Erie County's 9-1-1 system will notify their PSAP of their availability. If a unit or PSAP has notified MERS that it is unable to crew up, it will be marked appropriately in the Computer Aided Dispatch (CAD) system and will be bypassed for the next available mutual aid unit. All decisions on primary as well as mutual aid responses are pre-built into the CAD system for all municipalities and territories.

Goal

The goal of the countywide response plan is to expedite responses by eliminating the delay of any agency that has low staffing and who will not be able to crew up when being requested by the local PSAP for response to a 9-1-1 initiated call.

EMS Agency Responsibility

In accordance with New York's Public Health Law, specifically Chapter 45, Article 30, Section 3000, the provision of medical assistance during emergencies is a matter of utmost importance, significantly impacting public health, safety, and welfare. Ensuring prehospital emergency medical care, establishing efficient communication among ambulances and hospitals, and guaranteeing the safe and effective treatment and transportation of individuals who are ill or injured are all crucial aspects of public health services.

It's worth noting that the New York Public Health Law does not prescribe specific time-based criteria for determining an agency's inability to respond to an emergency request. However, the law does outline minimum staffing prerequisites for ambulances engaged in transportation from a scene to a hospital. As outlined in Chapter 45, Article 30, Section 3005-A of the public health law, these minimum staffing requirements entail having an emergency medical technician present with the patient. Moreover, for advanced life support first response services, the law stipulates that the minimum staffing standard requires an advanced emergency medical technician to be present with the patient.

In cases where the primary response agency lacks these minimum essential resources, they may call for mutual aid to respond to their call. When it becomes evident that an Emergency Medical Services (EMS) agency cannot promptly respond to a service call, this information is immediately communicated to the local 9-1-1 center. This communication serves the purpose of expediting a response from an alternate agency and where MERS can be contacted for the availability of ECEMS.

Dispatch Operations for ECEMS Both in and out of Area

General Guidelines for ECEMS Response:

- a. When a requesting agency requires advanced life support (ALS) or ambulance resources, standard procedure is to activate their predetermined mutual aid agreements and resources. This includes contracted commercial agencies.
- b. The requesting agency's fire chief or designee will initiate the mutual aid request through established communication channels.

Criteria for Response:

While ECEMS encourages departments to follow their existing mutual aid plans and contracts, the fire chief or their designee on scene holds the authority to directly request ECEMS ambulance resources without going through the aforementioned mutual aid process.

- ECEMS will dispatch a unit based on availability of units.
- Any request outside of a contiguous township covered under the "safety net" will require authorization from 600 or 601.

Policy No. 23-001	Revised:

Policy:	The following is the required level of equipment needed for Certified agencies to operate in the (8) eight county regions in Western NY.		
Procedure:	All Levels		
	Monitor* and/or AED		1
	Adult and Pediatric Defibrillation Pads		(2) Adult, (1) Peds
	Broselow Resuscitation Tape (or equivalent)		1
	Water Soluble Lubricant		6
	Alcohol Prep		12
	Tourniquet (trauma)		2 minimum
	Pulse Oximeter Device (self-standing or monitor)		1
	Bind Insertion Airway Device/Supraglottic (if credentialed)		1 ea size
	Nasal Airways 12,16,20,24,26,28,30,32		1 ea size or kit
	Meconium Aspirator		1
	Blood Glucose Measuring Device w/ sufficient supplied (If credentialed) ^^		1
	Nebulizer with tubing (If credentialed)		2
	CPAP Device (if credentialed)		1 ea size
	Device Capable of Waveform Capnography (If credentialed) **		1
	AEMT Level or higher (must have all above plus)		
	IV Catheters (14,16,18,20,22,24)		2 ea minimum
IV Administration Set (10gtt and 60gtt)		2 Each	

	IV administration set-Buretrol	1
	Saline Traps	4
	Saline Flush	5
	IV pressure infuser	1
	Intraosseous Needle or Device Capable of Pediatric and Adult Patient***	1 ea size
	3 Way Stop Cock	1
	IV Extension Tubing	1
	Chest Decompression Kit (Min 3/4" 14 Gauge IV Catheter)	2
	EMT-CC/Paramedic (must have all above plus)	
	12 Lead EKG with defib, capnography, pacing, cardioversion, and transmission capabilities	1
	Monitoring Electrodes	20 Each
	Syringes (1cc,3cc,10cc)	3 Each
	Needles (21ga,23ga,25ga)	3 Each
	Laryngoscope Handle	1
	Laryngoscope Blades (All sizes any variety)	1 ea size
	Spare Batteries and Bulbs	
	<i>2 batteries and 1 each size bulb if not disposable blades</i>	
	Endotracheal Tubes (with appropriate supply of stylets)	
	(Uncuffed Sizes: 2.5,3,3.5,4)	1 Each
	(Cuffed Sizes: 4.5,5,5.5,6,7,8,9)	1 ea (2 for 7-8)
	10 CC Needless Syringe	2
	End Tidal Device Capable of Adult and Pediatric Patients **	2
	Magill Forceps (Adult and Pediatric)	1 Each
	Optional	
	Infant Car Seat	1 Each
	FDA Approved Infant/Child Transporting Device	1 Each
	FDA Heimlich Valve or Equivalent	1 Each
	Chest Seals	2 Each

	FDA Approved Mechanical CPR Device	1 Each
	Umbilical Vein Catheterization Kit w/ FR3.5 FR5.0 (If Credentialed)	1
	FDA Approved Rapid Tracheostomy Device (If credentialed)	1 ea size
	FDA Approved Video Laryngoscope	1
	^^ Must have a valid CLIA license issued from Wadsworth Labs	
	* If carrying a monitor instead of an AED, the Monitor must have the same capabilities as the EMT-CC level	
	or higher	
	** These can be the same device. The basic equipment only requires it when the agency	
	is using it for any programs requiring its usage. Otherwise for EMT/AEMT loc it is optional	
	***If using an IO Gun sufficient adult and pediatric IO needles are required	
	Some devices listed in the equipment list can result in additional requirements such	
	as training, credentialing, or WREMAC/State Approval. Please consult with your Medical	
	Director regarding optional equipment and training.	
	Each agency can increase the Minimum Equipment List based on their department needs	
	Additionally, no agency is limited to carrying only what is on this list. This is the minimum required equipment list for the region.

	Nebulizer with tubing (If credentialed)		2
	CPAP Device (if credentialed)		1 ea size
	Device Capable of Waveform Capnography (If credentialed) **		1
	AEMT Level or higher (must have all above plus)		
	IV Catheters (14,16,18,20,22,24)		2 ea minimum
IV Administration Set (10gtt and 60gtt)		2 Each	

IV administration set-Buretrol	1
Saline Traps	4
Saline Flush	5
IV pressure infuser	1
Intraosseous Needle or Device Capable of Pediatric and Adult Patient***	1 ea size
3 Way Stop Cock	1
IV Extension Tubing	1
Chest Decompression Kit (Min 3/4" 14 Gauge IV Catheter)	2
EMT-CC/Paramedic (must have all above plus)	
12 Lead EKG with defib, capnography, pacing, cardioversion, and transmission capabilities	1
Monitoring Electrodes	20 Each
Syringes (1cc,3cc,10cc)	3 Each
Needles (21ga,23ga,25ga)	3 Each
Laryngoscope Handle	1
Laryngoscope Blades (All sizes any variety)	1 ea size
Spare Batteries and Bulbs	
<i>2 batteries and 1 each size bulb if not disposable blades</i>	
Endotracheal Tubes (with appropriate supply of stylets)	
(Uncuffed Sizes: 2.5,3,3.5,4)	1 Each
(Cuffed Sizes: 4.5,5,5.5,6,7,8,9)	1 ea (2 for 7-8)
10 CC Needless Syringe	2
End Tidal Device Capable of Adult and Pediatric Patients **	2
Magill Forceps (Adult and Pediatric)	1 Each
Optional	
Infant Car Seat	1 Each
FDA Approved Infant/Child Transporting Device	1 Each
FDA Heimlich Valve or Equivalent	1 Each
Chest Seals	2 Each

	FDA Approved Mechanical CPR Device	1 Each
	Umbilical Vein Catheterization Kit w/ FR3.5 FR5.0 (If Credentialed)	1
	FDA Approved Rapid Tracheostomy Device (If credentialed)	1 ea size
	FDA Approved Video Laryngoscope	1
	^^ Must have a valid CLIA license issued from Wadsworth Labs	
	* If carrying a monitor instead of an AED, the Monitor must have the same capabilities as the EMT-CC level or higher	
	** These can be the same device. The basic equipment only requires it when the agency is using it for any programs requiring its usage. Otherwise for EMT/AEMT loc it is optional	
	***If using an IO Gun sufficient adult and pediatric IO needles are required	
	Some devices listed in the equipment list can result in additional requirements such as training, credentialing, or WREMAC/State Approval. Please consult with your Medical Director regarding optional equipment and training.	
	Each agency can increase the Minimum Equipment List based on their department needs	
	Additionally, no agency is limited to carrying only what is on this list. This is the minimum required equipment list for the region.

Western Regional Emergency Medical Advisory Committee

Title: Collaborative Protocol Formulary Medication List	
Effective Date:	June 21, 2023
Reviewed:	

Policy:	The Western Regional Emergency Medical Advisory Committee (WREMAC) has established the following minimum stocking requirements for IV fluids and medications. This policy supersedes all previous WREMAC publications and reflects the fluid and medication stocking requirements in the 2022 NYS EMS Collaborative Protocols. Agencies are required to carry all equipment necessary to provide services in accordance with their scope of practice as defined in state and regional policies / protocols, and as approved and determined by their agency and medical director. Medications: Agencies may stock more than the minimum number per unit expected in this document.

*epinephrine (epinephrine kits or autoinjector [e.g. EpiPen®], as available and as trained) for adult and Pediatric patients. **All medications carried on EMT units must be approved by the WREMAC. *** Agencies may carry (12mg and 6mg) Minimum of 18 mg Adenosine																																																																																																																																														

Controlled Substances:

Medication	Route	Desired Unit
Fentanyl*	IM, IV, IO, IN	100 mcg
Ketamine	IM, IV, IO	500 mg
Midazolam	IM, IV, IO, IN	5 mg
Morphine	IM, IV, IO	10 mg

Controlled substances are required of all ALS agencies. All Paramedic / Critical Care agencies shall carry (1) Midazolam and (2) either fentanyl or morphine for narcotic analgesia. The decision to carry fentanyl, morphine, or both is determined by the Agency and its Medical Director. * **Fentanyl** is the preferred option for narcotic analgesia. Ketamine is an optional medication and determined by the Agency and its Medical Director. The Agency and its Medical Director consistent with Bureau of EMS and Bureau of Narcotic Enforcement policy determine quantities.

Medication Infusion

Medication	Concentration	Volume	Minimum ALS Unit	Minimum AEMT Unit
Dextrose 10%	25 gr / unit	250 mL	2	2
Normal saline 0.9% *		100 mL	1	
Normal saline 0.9% **		1000 mL	3	3

* D5W 100 mL bags may be substituted for normal saline 100 mL, if there is a persistent shortage and normal saline is not available.

**Lactated Ringers may be substituted for normal saline, if there is a persistent shortage and normal saline is not available.

Optional Medications

The following are optional medications and the decision to carry as well as quantities is determined by the Agency and its Medical Director.

Medication	Route	Desired Unit
Dexamethasone	PO	10 mg
Hydroxycobalamin (CyanoKit)	IV, IO	5 gr
Ketorolac (Toradol)	IM, IV	30 mg
Nitrous oxide	Inhaled	N/A
Ondansetron (Zofran)	PO	4 mg
Haloperidol (Haldol)	IM, IV	2.5-5mg
Oxymetolazone	IN	
Tranexamic Acid (TXA)	IV	1gm

Rapid Sequence Intubation (Optional)

Provision of Rapid Sequence Intubation is an optional program, however RSI-credentialed agencies must carry the minimum following medications.

Medication	Route	Desired Unit
Etomidate (Amidate)	IV, IO	40 mg
Rocuronium	IV, IO	100 mg
Succinylcholine	IV, IO	200 mg

Procedure: The policy has two components by level of care: Required Fluids & Medications and Optional Fluids & Medications.

	1. Required fluids and medications represent the minimum list of supplies to be considered “in service” as an AEMT or ALS unit. 2. Optional fluids and medications is a list of supplies that may be carried in addition to the required list but only with your medical director’s written approval. All questions concerning this policy should be directed the regional program agency or agency medical director. A list of regional program agencies has been provided below. EMS Program Agencies: • Erie, Wyoming, Niagara, Orleans & Genesee Counties - UBMD EMS Division: 716-829-5500 • Chautauqua, Cattaraugus, Allegany Counties Southern Tier EMS: 716-372-0614

Section 1: Purpose

The following document sets forth policies and procedures relating to the handling, storage, administration, waste, and management of expired or damaged controlled substances.

Section 2: Scope

This policy applies to all authorized individuals and ECEMS employees who are authorized to carry and administer controlled substances for Erie County Emergency Medical Services

Section 3: Responsibilities

Agency License

- Every two years, Erie County Emergency Medical Services ("ECEMS") shall obtain from the New York State Department of Health ("NYDOH") Bureau of Narcotics Enforcement ("BNE") an Agency License.

Controlled Substance Agent

- ECEMS shall designate a New York State Certified Emergency Medical Technician-Paramedic to serve as the Agency's Controlled Substance Agent ("Agent") to purchase, possess, and deliver controlled substances.

Controlled Substance Alternate Agent

- ECEMS shall designate a New York State Certified Emergency Medical Technician-Paramedic to serve as the Agency's Controlled Substance Alternate Agent ("Alternate Agent") to purchase, possess, and deliver controlled substances in the absence of the Agent.

Agency Medical Director

- ECEMS shall designate a New York State Licensed Physician to serve as the Agency's Medical Director ("Medical Director"). The Medical Director shall be accountable for the proper use and administration of controlled substances in accordance with New York State Collaborative Advance Life Support ("ALS") Adult and Pediatric Patient Care protocols.

CQI Committee

- ECEMS shall designate a New York State Certified Emergency Medical Technician-Paramedic to serve on the Agency's Clinical Quality Improvement ("CQI") committee. The CQI Paramedic shall work directly with the Medical Director and Agent to ensure quality assurance has been satisfied for each controlled substance administration.

Practitioner

- A Person who is authorized to carry and administer controlled substances for ECEMS. This person shall be a credentialed online New York State Certified Emergency Medical Technician- Paramedic, a credentialed online New York State Certified Emergency Medical Technician- Critical Care , ECEMS employee, OR authorized individuals the Agency Medical Director or designated Associate Medical Director.

Approved Witness

- A person who is authorized to witness the waste and disposal of a remaining partial dose of a controlled substance. An Approved Witness shall include the following Certified/Licensed individuals:
- An Emergency Medical Technician- Basic, Advanced Emergency Medical Technician, Emergency Medical Technician- Critical Care or Emergency Medical Technician- Paramedic that are employed by ECEMS, OR authorized individuals such as a Nurse, Pharmacist, Physician's Assistant, Nurse Practitioner or Physician at the receiving transport facility.

Section 4: Definitions

Medical Control means a physician that provides instruction via radio or telephone to an Emergency Medical Services Provider.

Portable Container shall refer to a portable controlled substance container which is secured with a common standard combination lock.

Narcbox shall refer to a permanently mounted, cloud connected, electronic, battery backed up metal box on an ALS vehicle which is accessed through a trackable, company-issued Personal Identification Number (“PIN”). The Narcbox also has an RFID scanner.

Combination Lock shall refer to a common standard combination lock that will secure the Portable Container. The combination for the lock will be set by the Agent or Alternate Agent. Only Practitioners will know the combination for the Combination Lock.

Radio Frequency Identification Tag (“RFID”) shall refer to a scannable tag that shall be affixed on each vial of a controlled substance.

- **HQ Locker** shall refer to a permanently mounted audit-controlled metal locker that will be located at the Agency’s base of operation, 500 Commerce Drive, Amherst, NY 14228 or 2950 Elmwood Ave, Buffalo, NY 14217 (Kenmore Mercy Hospital) which has an HQ locker on premises.

These lockers will be used to temporarily store controlled substances when they are removed from an ALS vehicle that is out of direct control of the Agency. The locker will also store controlled substances that have not yet been assigned to a sub-stock. Only the Agent and Alternate Agent shall have access to the HQ Locker.

Sub-Stock shall refer to controlled substances assigned to a particular Narcbox.

Section 5: Controlled Substance Access/Storage

Access/Storage

- Sub-stock of controlled substances shall be stored in a locked Portable Container within a Narcbox. The PIN to access the Narcbox as well as the combination to access the combination lock shall be maintained under direct control and possession of a Practitioner. If the Portable Container is removed from the Narc Box **AND/OR** if the controlled substance sub-stock is removed from the Portable Container in which it is stored, the Portable Container **AND/OR** that sub-stock shall be maintained under the direct control and possession of a Practitioner.
- Controlled substances shall be carried and stored in such a manner to protect them from light and extreme temperature changes.

- At no time shall controlled substances be carried in a non-agency vehicle or by personnel who are not authorized or not on duty.
- If a vehicle is temporarily out of direct control of the Agency (e.g., off site for vehicle repairs/ collision work), the controlled substances shall be removed from that vehicle and stored in the HQ Locker located at the Agency's base of operation 500 Commerce Drive, Amherst, NY 14228 or 2950 Elmwood Ave, Buffalo, NY 14217 (Kenmore Mercy Hospital) which has an HQ locker on premises.

Section 6: Controlled Substance Requisition

The following controlled substances shall be maintained on ECEMS's ALS vehicles in accordance with the NYS DOH and current Western Regional Medical Advisory Committee ("WREMAC") policies and protocols.

<u>Drug</u>	<u>Minimum Unit Level</u>	<u>Maximum Unit Level</u>
Morphine Sulfate	10mg	20mg
Fentanyl	200mcg	400mcg
Ketamine	500mg	1,000mg
Midazolam (Versed)	10mg	40mg

Fentanyl shall be limited to the maximum allowed and stocked in accordance with NYS DOH Policy Statement 17-04 (See Section 7).

Ketamine shall be limited to the maximum allowed and stocked in accordance with NYS DOH Policy Statement 17-03 (See Section 8).

Morphine Sulfate, Fentanyl, Ketamine, and Midazolam (Versed) shall be supplied in a tamper proof, single patient administration vial.

If ECEMS is unable to obtain any of the controlled substances listed above, ECEMS shall fulfill the stock requirement for that controlled substance with a WREMAC and NYS DOH BNE approved substitute.

****Only those certified at the Paramedic level shall be authorized to access, possess and administer Ketamine.**

The following controlled substances shall be maintained in ECEMS's HQ Locker.

Drug	Minimum Level	Maximum Level
Morphine Sulfate	5	10
Fentanyl	10	20
Ketamine	5	10
Midazolam (Versed)	5	10

Section 7: Pharmacy Agreement

The Catholic Healthcare System Department of Pharmaceutical Services shall act as the sole supplier of controlled substances for ECEMS ambulance. Controlled substances shall only be purchased/ ordered from the Catholic Healthcare System Department of Pharmaceutical Services. When the controlled substance supply on an ALS vehicle is lower than the minimum level, the Agent or Alternate Agent shall replace the controlled substance from the stock in the HQ Locker. When the controlled substance supply in the HQ Locker is lower than the minimum level, the Agent or Alternate Agent shall order replacement stock from the Catholic Healthcare System Department of Pharmaceutical Services pharmacy. Once notified by the pharmacy that the order is ready for pick-up, the Agent or Alternate Agent shall present photo identification to the pharmacy (i.e. valid NYS driver license) and pick up the order.

The Agent, Alternate, or Supervisor may pick up controlled substance orders. The Agent, Alternate, or Supervisor shall then transport the controlled substances in an Erie County vehicle and restock the ALS vehicle.

ECEMS shall supply the Catholic Healthcare System with all *Controlled Substance Administration and Waste Records* for any administered and/or wasted controlled substances.

All controlled substance orders shall be submitted on a Catholic Healthcare System *Medication Requisition and Billing Form*. The most current request form shall be made available through the Catholic Healthcare System Department of Pharmaceutical Services.

Signatures

This agreement entered on the day _____ and shall automatically extend annually. Either party may dissolve this agreement with a sixty (60)-day notice and return of all issued controlled substances to the Catholic Healthcare System Department of Pharmaceutical Services by the end of the agreement.

Section 8: Administration & Waste of a Controlled Substance

Administration

- Practitioners shall only administer controlled substances pursuant to the New York State Collaborative Advanced Life Support (“ALS”) Adult and Pediatric Patient Care protocols or a direct order from a medical control Physician. Under no circumstances shall a controlled substance be administered without a standing order or without an order from a medical control Physician. The Practitioner shall document the controlled substance administration in the ESO EHR documentation system, complete a *Controlled Substance Administration & Waste Record* (the RFID sticker from the used vial should be attached to this form), and log the administration into the Narcbox system. After the administration, the Practitioner shall notify the Supervisor-on-Duty and report the administration, waste, new count.

Waste

- If, after the administration, a partial dose of a controlled substance remains, the Practitioner shall dispose of the partial dose under the observation of an Approved Witness. The remaining dose shall be disposed of in a manner which ensures the remaining dose is unrecoverable. At no time shall controlled substances be wasted in a sharp container. The Practitioner shall then complete the *Controlled Substance Administration & Waste Record*, and the Approved Witness shall sign the *Controlled Substance Waste Verification* section as a witness to the disposal. The Approved Witness shall also document the witness of disposal into the Narcbox system.

Medical Control

- If a medical control was contacted and an order was received from a Physician at the receiving hospital, the ordering Physician shall sign the *Controlled Substance Administration & Waste Record* in the designated section.

Section 9: Fentanyl

Fentanyl shall be administered in accordance with the New York State Collaborative Advanced Life Support ("ALS") Adult and Pediatric Patient Care Protocols or a direct order from a medical control physician.

Each ALS vehicle shall have a maximum of 400mcg of Fentanyl. The NYDOH must approve a sub-stock that exceeds 400mcg of Fentanyl.

Fentanyl shall only be stocked in 2ml vials containing 50mcg/ml.

ECEMS shall in-service all Practitioners on the inventory, security and administration of Fentanyl.

ECEMS shall ensure compliance with the regional ALS protocol formulary which includes an appropriate antagonist in an amount proportional to the amount of Fentanyl carried, necessary to reverse the effects of a Fentanyl administration.

The Agent or Alternate Agent shall complete the semi-annual Controlled Substance Report (DOH 3848) for Pre-hospital ALS Agencies for Fentanyl. This report shall be submitted to the NYDOH before January 31st and July 31st of each year (See Section 9- Records/Reporting Requirements).

By December 31st each year, the Medical Director shall report to NYDOH a written report of the service's use of Fentanyl in the prior year no later than January 31st of each year (See Section 9- Records/Reporting Requirements). The report should include, but not be limited to the following:

1. Total number of administrations, amount of medication used and dose: and
2. Amount of Fentanyl wasted: and
3. Summary of the patient presenting problems: and
4. Narrative summary highlighting the quality assurance reviews conducted for each Fentanyl administration.

See Section 11 of this plan regarding theft, loss, diversion and damage/breakage.

**See Attachments for the Medical Director's written approval/request for the use of Fentanyl.

Section 10: Ketamine

Ketamine shall be administered in accordance with the New York State Collaborative Advanced Life Support ("ALS") Adult and Pediatric Patient Care protocols or a direct order from a medical control Physician.

Each ALS vehicle shall have a maximum 1,000mg Ketamine.

ECEMS shall provide in-service all Practitioners on the inventory, security, and administration of Ketamine.

The Agent or Alternate Agent shall complete the semi-annual Controlled Substance Report (DOH 3848) for Pre-hospital ALS Agencies Ketamine. This report shall be submitted to the NYDOH before January 31st and July 31st of each year (See Section 9- Records/Reporting Requirements).

By December 31st each year, the Medical Director shall report to the NYDOH a written report of the service's use of Ketamine in the prior year no later than January 31st of each year (See Section 9- Records/Reporting Requirements). The report should include, but not be limited to the following:

5. Total number of administrations, amount of medication used and dose: and
6. The amount of Ketamine wasted: and
7. Summary of the patient presenting problems: and
8. Narrative summary highlighting the quality assurance reviews conducted for each Ketamine administration.

See Section 11 of this plan regarding theft, loss, diversion and damage/breakage.

****See Attachments for the Medical Director's written approval/request for the use of Ketamine.**

****Only those certified at the Paramedic level shall be authorized to access, possess and administer Ketamine.**

Section 11: Record Keeping/Reporting Requirements

At the beginning and end of each shift, the Practitioner shall inventory the controlled substances sub-stock for the ALS vehicle to which he or she is assigned. This should be performed using the Audit function of the Narcbox. If the Practitioner is doing a shift change with another Practitioner, the inventory of the controlled substances shall be completed with both Practitioners (on coming and off going) present and by using the Shift Change function on the Narcbox.

On a weekly basis, the Agent or Alternate Agent shall review the NarcTrac online reporting website for each controlled substance sub-stock to ensure accuracy. Discrepancies in inventory shall be immediately investigated by the Agent or Alternate Agent.

On a monthly basis, the Agent or Alternate Agent shall inventory and audit the controlled substance stock in the HQ Locker to ensure accuracy. Discrepancies in inventory shall be immediately investigated by the Agent or Alternate Agent.

ECEMS shall maintain an active Roster of Participants/Practitioners.

ECEMS shall maintain a list of the Agency's ALS vehicles. The list shall consist of the vehicle identification number and verification of current insurance.

The Agent or Alternate Agent shall complete the semi-annual Controlled Substance Report (DOH-3848) for Pre-hospital ALS Agencies for Morphine, Fentanyl, Midazolam (Versed) and Ketamine. This report shall be submitted to NYDOH before January 31st and July 31st of each year.

By December 31st each year, the Medical Director shall report to the NYDOH a written report of the service's use of Fentanyl and Ketamine in the prior year no later than January 31st of each year. The report should include, but not be limited to the following:

9. Total number of administrations, amount of medication used and dose: and
10. Amount of Fentanyl and Ketamine wasted: and
11. Summary of the patient presenting problems: and
12. Narrative summary highlighting the quality assurance reviews conducted for each Fentanyl and Ketamine administration.

All records pertaining to controlled substances shall be kept at 500 Commerce Drive, Amherst, NY 14228 for a period of five years and shall be readily available and produced promptly for inspection by regulatory agencies.

Section 12: Theft, Loss, Diversion or Damage/Breakage

Theft, Loss or Diversion

- If an employee discovers a theft, loss or diversion of a controlled substance, that employee shall immediately report the theft, loss or diversion to the Supervisor-on-Duty, the Agent or Alternate Agent. The Agent or Alternate Agent shall immediately investigate and notify the Agency's Medical Director, Director of Ambulance Services, Catholic Healthcare System Department of Pharmaceutical Services and NYS DOH by 0900 the following business day. The Agent or Alternate Agent shall complete a *Loss of Controlled Substance Report (DOH-2094)* and submit that report to the NYDOH. The Practitioner and any/all other employees involved in the theft, loss or diversion of controlled substances shall be subjected to discipline, up to and including discharge pending the result of the investigation.

Damage/Breakage

- If a controlled substance vial becomes damaged or broken, the employee who identifies the damage or broken vial shall immediately report the damage to the Supervisor-on-Duty, the Agent or Alternate Agent. The Agent or Alternate Agent shall investigate the incident to discover if the incident could have been avoided. The Agent or Alternate Agent shall report the results of that investigation to the Agency's Medical Director, Director of Ambulance Services, Catholic Healthcare System Department of Pharmaceutical Services and NYS DOH. If a partial dose of the controlled substance remains in the damage or broken vial, the Practitioner shall waste the remaining dose under the observation of the Supervisor-on-Duty, The Agent or Alternate Agent. The remaining dose shall be disposed of in a manner which ensures the remaining dose is unrecoverable. At no time shall controlled substances be wasted in a sharp container. The Practitioner shall then complete the *Controlled Substance Administration & Waste Record* and the Supervisor-on-Duty, the Agent or Alternate Agent shall sign the *Controlled Substance Waste Verification* section as a witness to the disposal. The Agent or Alternate Agent shall complete a *Loss of Controlled Substance Report (DOH-2094)* and submit that report to the NYDOH. The Practitioner and any/all other employees involved in a case of damage/breakage to a controlled substance vial shall be subjected to discipline, up to and including discharge pending the result of the investigation.

Audits

- Any incident that involves the theft, loss, diversion or damage/breakage of a controlled substance shall trigger an audit of the involved Practitioner's controlled substance administration history. The purpose of the audit is to evaluate the Practitioner's history to

identify patterns of misuse of controlled substances or misapplication of either policy or protocol.

Section 13: Expired Controlled Substances

All expiring or expired controlled substances shall be returned to the Catholic Health System Department of Pharmaceutical Services pharmacy. Expired controlled substances shall not be wasted.

Section 14: Quality Assurance/Improvement

All ECEMS Practitioners shall be trained in the inventory, security and administration of controlled substances.

The CQI Committee and Agent shall work directly with the Medical Director on the quality assurance of each controlled substance administration. The quality assurance review shall serve to satisfy the Medical Director's CQI Program and shall require 100% quality assurance for instances where controlled substances have been administered. The CQI Committee Agent and Medical Director shall ensure that each controlled substance administration was performed in accordance with the New York State Collaborative Advanced Life Support ("ALS") Adult and Pediatric Patient Care protocols or an order from a medical control Physician.

The CQI Committee and Agent shall ensure that the EHR and *Controlled Substance Administration & Waste Record* are complete, legible and accurate. Deficiencies shall be documented and corrected by the Practitioner.

Section 1: Purpose

To outline the process for performing and documenting scheduled vehicle maintenance and equipment servicing/inspections.

To ensure that vehicles and equipment are ready for service, properly maintained and meet the requirements set forth in New York State Emergency Medical Services 10 NYCRR Part 800 and New York State Emergency Medical Services Policy Statement 02-11.

New York State Department of Health 10 NYCRR of Part 800 – Emergency Medical Services, requires that every New York State ambulance or first response service have and enforce a written policy concerning preventative maintenance for vehicles and certain types of patient care equipment.

Vehicle Maintenance

Section 2: Responsibilities

Erie County Emergency Medical Services Division:

- Responsible for performing daily or regular mechanical inspections;
- Reporting any vehicle mechanical problems to the Erie County Fleet Maintenance Department;
- Documenting mechanical inspection findings.

Erie County Fleet Maintenance Department:

- Responsible for routine scheduled maintenance;
- Annual New York State Safety/Emissions Inspection;
- Diagnosing, repairing and/or referring any reported vehicle mechanical problems;
- Maintaining vehicle repair records.

Section 3: Shift Mechanical Inspections

At the beginning of each shift, Erie County Emergency Medical Services employees shall complete a mechanical inspection for the vehicle that they are assigned. A Daily Mechanical Inspection report shall be accurately documented and submitted using the supplied software. The mechanical inspection shall include the following:

- Inspect all emergency lights, headlights, scene lights, brake lights, turn signals, reverse lights, interior lights, siren system and horn;
- Check fuel status and refuel as needed;

- Check all of the following fluids: brake, oil, transmission, coolant, power steering and washer fluid;
- Inspect windshield wiper blades;
- Inspect tires for wear and proper air pressure;
- Inspect the vehicle for damage;
- Check heating, ventilation and air conditioning system;
- Wash the exterior of the vehicle as needed;
- Report any vehicle damage or mechanical problems to the Supervisor-on-Duty.

Section 4: Routine Vehicle Maintenance

Oil, filter and lube shall be conducted every 3,000 miles or as recommended by Erie County Fleet Maintenance Department.

Brake service shall be done as recommended by the Erie County Fleet Maintenance Department or on an as needed basis.

Tire rotation and replacement shall be done as recommended by the Erie County Fleet Maintenance Department or on an as needed basis.

Section 5: Multi-Point Inspection

Erie County Fleet Maintenance shall conduct an annual New York State Safety/Emissions Inspection. The New York State Safety/Emissions Inspection shall include the following:

- Seat belts;
- Brakes;
- Steering, front end, suspension, chassis, frame and wheel fasteners;
- Tires;
- Lights;
- Windshield and other glass;
- Windshield wipers and blades;
- Horn;
- Mirrors;
- Fuel leaks;
- Emissions inspection.

Equipment

Section 6: Preventative Maintenance Equipment

The Preventative Maintenance Plan shall include the following types of equipment:

- LifePak 15;
- LUCAS 3 - Cardiopulmonary Resuscitation ("CPR") device;
- Stryker Power-Pro 2 Cot;
- Stryker Power-LOAD system;
- Stryker Xpedition Power Stair Chair;
- SSCOR VX2 portable suction unit.

Section 7: LifePak 15

The manufacturer recommends yearly servicing/inspection.

Servicing/inspection shall be performed by Stryker.

The Stryker ProCare service plan shall provide an annual onsite preventative maintenance inspection and unlimited repairs including parts, labor and travel with battery coverage. The annual preventative maintenance inspection shall include the following:

- Monitor/defibrillation testing (manual & automated external defibrillator ("AED") mode);
- Pacer output testing;
- Pulse oximetry testing;
- End-tidal carbon dioxide ("ETCO2") capnography testing;
- Automated blood pressure cuff testing;
- 4 lead and 12 lead EKG testing.

In addition to the annual preventative maintenance servicing/inspection, Erie County Emergency Medical Services employees shall perform routine shift inspections before and after each use. Deficiencies shall be reported to the Supervisor-on-Duty. The manufacturer recommends the following device maintenance inspection for the LifePak 15:

Device maintenance

Most hospitals and EMS services have specific protocols for maintaining their defibrillators. Stryker provides a variety of tools designed to help manage inspection and maintenance procedures. Training for staff would depend on a hospital's or EMS service's particular approach.

BLS-trained responders should be familiar with several of the device maintenance procedures. How much detail you choose to go into will depend on your hospital's protocols.

References to buttons are indicated in **BOLD** and display messages are indicated in *ITALICS*. For complete information, review the Operating Instructions for the device.

Task	User actions	
Check defibrillator for Daily Auto Test results, if configured on.	• Ensure that the batteries are fully charged. • Ensure that the defibrillator is plugged into the AC power adapter and that the adapter is plugged into electricity, if applicable. • Ensure that the QUIK-COMBO® therapy cable is connected to the defibrillator. or • Ensure the standard paddles are clean, dry and properly seated in the paddle wells and connected to the defibrillator. If the defibrillator detects a problem during the self-test the printed report will indicate <i>SELF TEST FAILED</i>. The SERVICE LED will illuminate the next time it is turned on. Defibrillator should be checked daily following the auto test to confirm the test passed. If test failed or incomplete perform the manual user test.	
Task	User actions	Instructor activity
Perform QUIK-COMBO therapy cable check in Manual mode:*	1. Disconnect and examine cable for cracking, damage, broken, or bent parts or pins. 2. Connect therapy cable to defibrillator and the Test Load. 3. Select 200 JOULES and press CHARGE. 4. Press  (SHOCK) button. 5. Confirm <i>ENERGY DELIVERED</i> message appears. 6. Remove the Test Load from cable.** (<i>PADDLES LEADS OFF</i> appears if Paddles lead displayed.) * The defibrillator delivers up to 360 Joules of electrical energy. Unless discharged properly, this electrical energy may cause serious personal injury or death. Do not attempt to perform this test unless you are qualified by training and experience. **Failure to remove the Test Load may result in delay of therapy during patient use.	Confirm test load is connected to QUIK-COMBO cable.

Task Perform standard (hard) paddles check in Manual mode.*	User actions 1. Disconnect and examine cable for cracking, damage, broken or bent parts or pins. 2. Connect paddles to defibrillator. 3. Examine for paddle surface pitting and presence of dried or wet gel. 4. Press LEAD. Select Paddles. 5. On paddles, turn ENERGY SELECT dial to 10 JOULES. 6. With paddles in paddle wells, press CHARGE button on paddle. 7. Press only one (SHOCK) button and release. Confirm that energy was not discharged. 8. Press the other (⚡) (SHOCK) and release. Confirm that energy was not discharged. 9. Press both (⚡) (SHOCK) and confirm ABNORMAL ENERGY DELIVERED message appears. 10. Remove paddles from wells, and confirm artifact on screen. 11. Place paddle surfaces together, and confirm flat line on screen. 12. Return paddles securely to paddle wells.	
Task Inspect the physical condition of the defibrillator.	User action Inspect defibrillator for damage and foreign substances.	
Task Inspect power source.	User actions • Confirm that batteries are fully charged. • Confirm that Auxiliary Power Indicator is on if applicable.	
Task Check therapy and ECG electrodes.	User actions Check QUIK-COMBO and ECG electrodes for "use by" date and that a spare set is available.	
Task Examine accessory cables.	User actions Inspect all cables including power cord for cracks, broken or bent parts and pins, and, if applicable, paddle surfaces for pitting.	
Task Disconnect defibrillator from AC power. Press ON . Look for SELF-TEST message and illumination of LEDs.	User actions Defibrillator turns on. • If defibrillator doesn't turn on, contact qualified service personnel. • There should not be low battery or replace battery messages visible. If visible, it means one or both batteries need to be charged.	Instructor activity This only applies to devices with the AC Power Adapter.

Task	User actions
Perform Manual User Test. Press ON . • Press OPTIONS . • Select USER TEST .	• Confirm AC MAINS LED is lit, if applicable. • User action, defibrillator labels, text/voice prompts and information • The manual user test should be performed if your protocol requires more frequent testing than the recommended daily auto test, or the daily auto test failed or did not complete. Note: If the defibrillator is in AED mode, switch to manual mode by Pressing the ENERGY SELECT button. Device will print the test results when the test completes. If the user test fails, contact qualified service personnel.
Task	User actions
Cleaning	Clean the LIFEPAK 15 monitor/defibrillator, cables and accessories with a damp sponge or cloth. Do not use bleach. Use only the agents listed below: • Quarternary ammonium compounds • Isopropyl alcohol • Peracetic (peroxide) acid solutions

Section 8: LUCAS 3

The manufacturer recommends yearly servicing/inspection.

Servicing/inspection shall be performed by Stryker.

The Stryker ProCare service plan shall provide an annual onsite preventative maintenance inspection and unlimited repairs including parts, labor and travel with battery coverage. The annual preventative maintenance inspection shall include the following:

- Chest compression system check;
- Suction cup installation;
- Patient straps;
- Stabilization straps;
- Slim back plate inspection;
- Hard shell case inspection;
- Battery testing.

In addition to the annual preventative maintenance servicing/inspection, Erie County Emergency Medical Services employees shall perform routine shift inspections before and after each use. Deficiencies shall be reported to the Supervisor-on-Duty. The manufacturer recommends the following device maintenance inspection for the LUCAS 3:

Routine Checks

Weekly, and after each use of the LUCAS 3, perform the following:

- Ensure that the device is clean;
- Ensure that a new Suction Cup is installed;
- Ensure that the Patient Straps are attached;
- Ensure that the two support leg straps of the Stabilization Strap are attached around the support legs, and that the neck strap is placed in the Carrying Case;
- Pull the release rings upwards to make sure that the claw locks are open;
- Ensure that the battery is fully charges. When the LUCAS device is in the off mode, push MUTE. The battery indicator illuminates and shows the battery charge status;
- Push ON/OFF to make the device perform a self-test. Ensure the ADJUST LED illuminates with no alarm or warning LED;
- Push ON/OFF to power down the device again;
- Ensure that the external power supply cord is not damaged.

Section 9: Stryker Power-Pro 2 Cot

The manufacturer recommends yearly servicing/inspection.

Servicing/inspection shall be performed by Stryker.

The Stryker ProCare service plan shall provide an annual onsite preventative maintenance inspection and unlimited repairs including parts, labor and travel with battery coverage for all Power-Pro Cots MTS 6506.

In addition to the annual preventative maintenance servicing/inspection, Erie County Emergency Medical Services employees shall perform routine shift inspections before and after each use. Deficiencies shall be reported to the Supervisor-on-Duty. The manufacturer recommends the following preventative maintenance schedule for the Power-Pro 2 Cot:

Every Month

Stryker Power-Pro 2 Cot	
Settings	In-fastener shutoff configuration
Cylinder	Extended cylinder rod and wipe with a soft cloth and household cleaner
Cables and wires	No hanging wires from routings or connections
	Hand tighten foot end electronics cable
Manual back-up release handle	Manual back-up release handle functions
Litter	Frame and litter
Base	Frame and base
Wheels	All wheels are secure, roll, and swivel
Head section	Pull toward the head section to check that the safety bar swings and rotates freely and pulls back to the position
Foot section	Extend and retract
	Functions and latches
Restraint	Function with no excessive wear (such as a bent or broken receiver or latch plate or torn or frayed webbing)
Battery	Housing and terminal area for cracks or damage before first and every use
Charger	For cuts in the cord, bent pins or contracts, or cracks in the housing before first and every use

Every Three Months

Stryker Power-Pro 2 Cot	
Hydraulics	Motor mount fasteners are secure
	No hydraulic fluid leaks
	No leaks from reservoir
Cables and wires	No damage or pinching or wiring harness, cable, or lines
	No damage connectors
Manual back-up release handle	Base extends and retracts when you pull the manual back-up release handle
	Cot does not lower when you pull the manual backup release handle with 125 lb (57kg) or more on the cot
Litter	All fasteners are secure
	Backrest cylinder operates
	Adjust pneumatic cylinder for full range of motion, if required
Base	All fasteners are secure
X-frame	X-frame expands and retracts
Head section	All fasteners are secure
	Head section extends and locks
Foot section	Transports handle extends and locks in 90 degree upright position
	All fasteners are secure
	Foot section extends and locks in the retracted, mid, and extended position
	Slow and lock transport handle
	Foot end guide lights operate

Every Six Months

Stryker Power-Pro 2 Cot	
Electronic controls/functions	Extend cot to raised position, measure and check load height
	Jog function operates
	High speed retract and extend operates
	Bumper detection operates
	Press the release or transport height button and confirm correct height
	Measure load height and confirm correct height
Switches	No damage or wear to switches
	All switches operate
Litter	No bent, broken, or damaged components
	No damage or tears on the cot grips
	Siderails operate and latch
	Footrest operates
Mattress	No cracks or tears
Base	No bent, broken, or damaged components
	Cot retaining post is secure. If not, replace the screw.
	No excessive damage to X-frame guards
Wheels	Free of debris
	Steer-Lock and wheel locks operate
	Check brake cable (between Steer-Lock and wheel lock) for wear, bends, creases
Head section	No bent, broken, or damaged components
	Grip bar has no excessive damage or tears
	Load wheels are secure and roll
Foot section	No bent, broken, or damaged components
	Grip bar has no excessive damage or tears

Every Twelve Months

Stryker Power-Pro 2 Cot	
Settings	Cot and fastener fit and function
	Safety bar connects to the vehicle safety hook
Manual back-up release handle	Returns to the stowed position
Litter	All welds are intact, not cracked, or broken
	Warning labels present and legible
Base	All welds are intact, not cracked, or broken
Retractable head section oxygen bottle holder	Straps and clips for wear
Foot section	Foot end hitch latch hooks not worn
Cable and wires	Foot end interface board cable connector is tight

Section 10: Stryker Power-LOAD System

The manufacturer recommends yearly servicing/inspection.

Servicing/inspection shall be performed by Stryker.

The Stryker ProCare service plan shall provide an annual onsite preventative maintenance inspection and unlimited repairs including parts, labor and travel for MTS POWER-LOAD.

Section 11: Stryker Xpedition Power Stair Chair

Erie County Emergency Medical Services employees shall perform routine daily inspections before and after each use. Deficiencies shall be reported to the Supervisor-on-Duty. The manufacturer recommends the following daily inspection procedures for the Stryker Xpedition Chair:

- All fasteners secure;
- All welds intact, not cracked or broken;
- No bent or broken tubing or sheet metal;
- No debris in wheels;
- All wheels secure and rolling;
- Front casters secure, rolling, and swiveling (if equipped);
- Wheel locks hold wheels securely when on and clear the wheels when off;
- Chair unfolds and locks properly;
- No rips or cracks in seat or backrest;
- Restraints straps intact and working;
- Foot end carrying handles extend and lock in place;
- Head end carrying handles fold and unfold;

- Upper control handle extends and locks in all positions;
- Stair-TREAD system mechanism unfolds and locks in place (if equipped);
- Stair-TREAD system belt rolls (if equipped);
- Stair-TREAD system belt inner cords not showing; replace if necessary (if equipped);
- Stair-TREAD system perform as desired; recondition belts or the track frame surfaces;
- Upper release handle cable not worn or frayed; replace if necessary (Model 6252);
- Optional accessories and parts intact and operating properly.

The manufacturer recommends Stair-TREAD system belt reconditioning after approximately 500 flights of stairs or if the Stair-TREAD system performance is sluggish.

Section 12: SSCOR VX-2 Portable Suction

Erie County Emergency Medical Services employees shall perform routine daily inspections before and after each use. Deficiencies shall be reported to the Supervisor-on-Duty. The manufacturer recommends the following daily inspection procedures for the SSCOR VX-2 Portable Suction unit:

Preventative Maintenance

- When the SSCOR VX-2 is not in use, keep batteries on continuous charge;
- Test the SSCOR VX-2 at regular intervals;
- Make sure the SSCOR VX-2 is always clean and ready for use;
- If the procedure produced an excessive quantity of fluids, check the vacuum line for evidence of moisture. If the vacuum line between the pump and canister is moist, it is possible that fluids have reached the vacuum pump. Disinfect as needed.

Battery Test

Run the following test whenever poor battery quality is suspected to ensure proper performance of the device:

- Check that the power source connected LED on the control panel and the green battery condition LED are lit;
- Remove the power cord and run the unit from its internal DC battery or power source;
- Check for vacuum by occluding the patient tube and set the vacuum regulator to the maximum vacuum setting;
- Observe the regulator gauge. The vacuum reading should rise to -300mmHg from zero in less than 3 seconds. It should max out at $\geq -525\text{mmHg}$. Un-occlude the patient tubing;
- Allow the unit to run for 15 minutes on DC power. If the unit stops or slows during the 15 minutes, or if the battery condition indicators begin to blink, it is possible the battery capacity has been depleted. It is time to replace the battery;
- If the unit is still running at full power after 15 minutes, adjust the regulator to the desired setting, turn the device off and put it back on charge.

Section 13: Records

Erie County Emergency Medical Services shall record or log (paper or electronic) for each piece of equipment that contains:

- When and where the equipment was purchased/obtained;
- Documentation pertaining to the repairs of the piece of equipment;
- Equipment maintenance schedule per the manufacturer's instructions;
- Documentation pertaining to all maintenance performed on the equipment.

Erie County Emergency Medical Services shall maintain a record of all patient care equipment failures that could have resulted in harm to a patient and the corrective action taken. A copy of this record shall be submitted to the New York State Bureau of Emergency Medical Services and Trauma Systems with the Agency's biennial recertification application.

Section 1: Purpose	3
Section 2: Scope	3
Section 3: Shift Equipment Inspection	3
Section 4: Shift Mechanical Inspection.....	4
Sections 5: Post-Transport Duties... ..	5
Section 6: End of Shift Duties... ..	5
References.....	5

Section 1: Purpose

To outline the responsibilities for ensuring that Erie County Emergency Medical Services vehicles and equipment are ready for service, properly maintained and meet the requirements set forth in the New York State Department of Health 10 NYCRR of Part 800 – Emergency Medical Services.

New York State Department of Health 10 NYCRR of Part 800 – Emergency Medical Services, requires that every New York State ambulance or Advanced Life Support First Response service have and enforce a written policy which describes the practices for equipping and inspection of authorized Emergency Medical Services vehicles.

Section 2: Scope

This policy applies to all authorized Erie County Emergency Medical Services drivers and/or certified care providers.

Section 3: Shift Equipment Inspection

At the beginning of each shift, Erie County Emergency Medical Services employees shall complete an equipment inspection for the vehicle that they are assigned. A BLS Daily Equipment Inspection report and an ALS Daily Equipment Inspection report shall be accurately documented and submitted using the ESO software program. The items on the Daily Equipment Inspection reports shall represent the minimum equipment standards for Erie County Emergency Medical Services. The equipment inspection shall include the following:

- Inspect all patient-care equipment and ensure that all equipment is in good working condition and functioning properly;
- Perform a cardiac monitor defibrillator test and monitor inspection as recommended by the manufacturer;
- Restock any missing equipment;
- Replace any broken equipment;
- Replace any expired equipment and/or medications;
- Authorized ALS providers shall inspect and inventory controlled substances in accordance with Erie County's Controlled Substance Plan;
- Ensure that the equipment and interior of the vehicle are clean and sanitary;

- Ensure that all equipment, or any item that could be considered a projectile, is secured;
- Report any equipment issues and/or deficiencies to the Supervisor-on-Duty.

If the crew is required to respond to a call at the beginning of the shift, the equipment inspection shall be done as soon as reasonably possible.

If ESO is unavailable due to a connectivity issue, software update or maintenance, the Erie County Emergency Services employees shall accurately document a paper version of the Daily Inspection report.

Section 4: Shift Mechanical Inspection

At the beginning of each shift, Erie County Emergency Medical Services employees shall complete a mechanical inspection for the vehicle that they are assigned. A Daily Mechanical Inspection report shall be accurately documented and submitted using the ESO Software. The mechanical inspection shall include the following:

- Inspect all emergency lights, headlights, scene lights, brake lights, turn signals, reverse lights, interior lights, siren system and horn;
- Check fuel status and refuel as needed;
- Check all of the following fluids: brake, oil, transmission, coolant, power steering and washer fluid;
- Inspect windshield wiper blades;
- Inspect tires for wear and proper air pressure;
- Inspect the vehicle for damage;
- Check heating, ventilation and air conditioning system ;
- Wash the exterior of the vehicle as needed;
- Report any vehicle damage or mechanical problems to the Supervisor-on-Duty.

If the crew is required to respond to a call at the beginning of the shift, the mechanical inspection shall be done as soon as reasonably possible.

If ESO is unavailable due to a connectivity issue, software update or maintenance, the Erie County Emergency Services employees shall accurately document a paper version of the Daily Mechanical Inspection report.

Section 5: Post-Transport Duties

Following each patient transport, the following duties shall be performed prior to returning to service:

- Clean and sanitize any patient-care equipment use;
- Clean and sanitize the stretcher and replace any linen as needed;
- Dispose of any soiled or used linen in an approved soiled linen receptacle;
- Dispose of any biohazardous waste in an approved biohazardous waste receptacle;
- Clean and sanitize the interior of the ambulance.

Section 6: End of Shift Duties

The following duties shall be performed at the end of shift:

- Replace any equipment used;
- Ensure that the equipment and interior of the vehicle are clean and sanitary;
- Refuel the vehicle if the fuel is less than 3/4 full;
- Wash the exterior of the vehicle;
- Report any equipment issues or mechanical problems to the Supervisor-on-Duty.

New York State Department of Health 10 NYCCR Part 800 – Emergency Medical Services

New York State Department of Health Bureau of Emergency Medical Services & Trauma Systems
Policy Statement 95-09 Developing EMS Agency Policies and Procedures

	New York State Department of Health Bureau of Emergency Medical Services POLICY STATEMENT <i>Supersedes/Updates: New</i>	No. 02-11 Date: 09/25/02 Re: Preventive Maintenance of EMS Vehicles and Equipment Page 1 of 3
---	--	---

PURPOSE:

This policy statement is intended to provide EMS agencies with guidance to assist them in meeting their requirement to have policies regarding preventive maintenance for all EMS vehicles and equipment pursuant to 10 NYCRR Part 800.21(p)(8).

EMS VEHICLES:

The most effective source of information regarding the preventive maintenance program for an EMS vehicle comes from the manufacturer's "Operating Instructions" or "Owner's Manual" that was provided with the vehicle at the time of delivery. If your agency does not have a copy of this type of information than it should be obtained from the manufacturer.

An agency policy developed to comply with 800.21(p)(8) should include (but not be limited to):

- Annual DMV Inspection
- Fluid and filter change intervals
- Tire rotation intervals
- Fluid level check schedule
- Battery check intervals
- Inspection of lights and the electrical system
- Inspection of belts, hoses and clamps
- Inspection of doors and gaskets
- Brake service intervals
- Evaluation of the heating and cooling system
- Schedule of other maintenance procedures particular to vehicle
- Procedures for daily/weekly inspections to be performed by members/employees
- Procedures employees/members should follow in the event a malfunction occurs

As important as the performance of these procedures, of equal importance is their documentation. Services are urged to maintain complete maintenance records on all their vehicles. Such records should include inspection reports as well as records of services

performed by either the agency's employees/members, outside vendors or representatives of the vehicle manufacturer. This record might also contain any service bulletins or recall notices issued by the manufacture and records of compliance with their recommendations.

Personally owned vehicles operated as Emergency Ambulance Service Vehicles (EASV) should also be covered by the agency's policy to assure that the owner/operator of the vehicle is maintaining the vehicle and it is capable of emergency response and safe operation.

EMS EQUIPMENT:

Nearly all pieces of EMS equipment come with some form of an "Owner's Manual" or "Operator's Guide". These documents need to be retained and reviewed by appropriate agency staff and the procedures for care and maintenance should be followed.

Each agency's policy on preventive maintenance of equipment should include, but not be limited to, provisions to:

- Perform manufacture's recommended calibrations/inspections
- Perform manufacture's recommended service (including lubrications) and the proper materials to use in performing recommended service
- Replace and service batteries (if applicable)
- Proper inspection of all equipment available to provider
- Proper cleaning and disinfecting procedures
- Procedures for removing equipment from service
- Procedures to be followed in the event of equipment failures

The following types of equipment should be covered by any preventive maintenance or biometric service policy developed by an agency:

- Radios and other communications equipment
- Stretchers and stretcher mounting hardware
- AEDs
- ECG/Manual Defibrillator equipment
- Pulse oximeters
- Suction devices
- Rechargeable battery powered lights
- BP Cuffs; manual and automatic
- Patient stabilization/transportation/immobilization devices
- Oxygen regulators and delivery systems
- Ventilators
- Infusion devices
- Specialized pieces of equipment owned or operated by the service

As with vehicles EMS agencies should have a record or log (paper or electronic) for each piece of equipment that contains:

- When and where the equipment was purchased/obtained
- Documentation pertaining to repairs of the piece of equipment
- Equipment maintenance schedule per the manufacturers instructions
- Documentation pertaining to all maintenance performed on the equipment

All agencies are reminded that they must “maintain a record of all unexpected authorized EMS response vehicle and patient care equipment failures that could have resulted in harm to a patient and the corrective actions taken. A copy of this record shall be submitted to the Department with the EMS service's biennial recertification application”¹

The development of clear and concise policies provide EMS service employees/members with an understanding as to what each member of the organizations roles and responsibilities are relating to maintaining, servicing and repairing agency equipment and vehicles. These policies also serve to allow providers to have functioning vehicles and equipment to provide the best possible patient care.

Issued and Authorized by:
Edward G. Wronski, Director
Bureau of EMS
